A Personal View of Rural Health Leadership: It’s All About Collaboration & Advocacy

Tim Size
Executive Director
Rural Wisconsin Health Cooperative

Rural Voices Leadership & Policy Meeting
Washington DC
3/30 – 4/1/09

Outline of Presentation

1. Presenter’s Perspective
2. Rural Advocacy Often Deals With Myths
3. Why Collaboration & Advocacy Needed?
4. Community Collaboration Not New
5. Why Aren’t We Doing It?
6. Starting or Expanding Collaboration
7. Become a More Active & Effective Advocate
8. Anticipate Barriers to Change
1. Presenter Perspective

Advocacy at RWHC is based on the evidence but like us all, we have a set of experiences and beliefs that drive our work.

Founding Principle: “Strength in Numbers”

First RWHC Cartoon shortly after being founded in 1979.
RWHC Mission & Vision

Mission: Rural WI communities will be the healthiest in America.

Vision: RWHC is a strong and innovative cooperative of diversified rural hospitals; it is (1) the “rural advocate of choice” for its members and (2) develops & manages a variety of products and services.

Specifics re services available at http://www.RWHC.com

RWHC by the Numbers

- Founded 1979
- Non-profit coop owned by 35 rural hospitals (net rev ≈ $3/4B; ≈ 2K hospital & LTC beds)
- ≈ $7M RWHC budget (≈70% member fees, 20% fees from others, 5% dues, 5% grants)
- 6 PPS & 29 CAH; 24 freestanding; 11 system owned or affiliated
RWHC Collaborative Services

- Advocacy (Market, Government)
- CAHPS Hospital Survey (AHRQ)
- Clinical: Audiology, Speech, PT
- Coding Consulting Service
- Compliance (Medicare)
- Credentials Verification (NCQA)
- EHR Shared Platform & Support
- Financial Consulting Service
- H2H Learning from Each Other

- Health Careers Web Template
- Health Plan Insurer Contracting
- IT Services, Wide Area Network
- Legal Services
- Peer Review Service
- Professional & Staff Roundtables
- Quality Indicators (JCAHO)
- Recruitment (Nursing/Allied)
- Reimbursement Credentialing

RWHC Current Advocacy Priorities

- Mitigate Work Force Shortages & Maldistribution
- Promote Fair Federal & State Payments & Policies
- Broaden Focus from Healthcare to Community Health
- Fight Exclusionary Market Practices
- Keep Local Care Local
- Support Fair Quality/Price Transparency
- Resist Inappropriate Regulation of Hospitals
Collaboration & Advocacy Use Similar Skills

Identify Need  Identify Partners
Persevere  Collaborate
Evaluate  Innovate
Take Action

Above “leadership Cycle” is a variation of the traditional PDSA (plan, do, study, act).

Rural Advocates Work in Private & Public Sectors

- Rural Health exists in and is driven by both private and public sector beliefs, behaviors and policies.
- Focus is on taking action for a desired future.

"Why is it legal for our only doctors to be denied payment from our only insurance?"

Rural Wisconsin Health Cooperative
Rural Advocacy Needs to Be 24/7

Rural advocates have an ongoing challenge:

• Public and private sector policy nationally, and even in our states, can be ill informed about or not attend to rural health.

• We must not become complacent; all of us must become more skilled and more active.

2. Rural Advocacy Frequently Deals With Myths

RWHC Eye On Health
Myths that Mislead Public & Private Policy

- Rural is west (TX, NC, PA, OH, MI, NY top rural pop.)
- Rural Americans are naturally more healthy
- Rural economy is mostly about agriculture
- Rural health care should cost less than urban care
- Rural health care is inordinately expensive
- Rural health care is lower quality; bigger/urban is better
- Rural hospitals are just band-aid stations
- Rural hospitals & clinics are poorly managed/governed
- Rural residents don’t want to get care locally

* U.S. 2000 Census, Non-Metro Population By State

3. Why Collaboration & Advocacy Needed?

“We must help all reach highest potential for health and reverse the trend of avoidable illness. Individuals must achieve healthier lifestyles; take responsibility for health behaviors and choices… and act.”

Spending Trend Is Widely Seen As Unsustainable

![Graph showing national health expenditure as % GNP from 2001 to 2016.](image)

A Sicker  Chronic Illness On The Rise

![Graph showing prevalence of obesity as percent U.S. population, 1990-2002.](image)

- Half of Americans have one or more chronic illnesses
- 80% of spending is linked to chronic illness
- Much of this is avoidable
- Obesity has doubled; Diabetes is on the rise

Health Status in Wisconsin Counties

Worst Quartile (white)
Second Quartile (red)
Third Quartile (redder)
Best Quartile (reddest)

75% urban counties better than average compared to 33% of rural counties better than average.

Above calculated from the 2007 “Wisconsin County Health Rankings,” UW Population Health Institute

Healthy Rural Communities More Than Health Care

Rural counties in Wisconsin are predicted to have worse health status and they do because individual behaviors like smoking and exercising matter, as do education, jobs and income.

These factors influence individual and community health as much or more than access to quality health care.

Above calculated from the 2007 “Wisconsin County Health Rankings,” University of Wisconsin Population Health Institute
Critical Link of Community & Economic Health

“Businesses will move to where healthcare coverage is less expensive, or they will cut back and even terminate coverage for their employees. Either way, it's the residents of your towns and cities that lose out.”

Thomas Donohue, President & CEO, U.S. Chamber of Commerce

“If we can change lifestyles, it will have more impact on cutting costs than anything else we can do.”

Larry Rambo, CEO, Humana Wisconsin and Michigan
Rural Jobs Need New Rural Health Strategy

• Business community & public policymakers essential components for healthy communities. *Benjamin*

• Need to go beyond history of governmental public health and private practitioner animosity to achieve benefits of public-private partnership. *McGinnis*

• Key link between worker health, productivity and economic benefit. *Simon & Fielding*

*Health Affairs, July/August, 2006*

Community Health a Rural Opportunity (1 of 2)

We See . . .

• Advances are being made both in outcomes measurement as well as in understanding health determinants.

• More attention is being paid to the value questions of what we get for what we invest.

But . . .

• Little policy time/money devoted to these issues

• No public or private entity has accountability for over all community health outcomes

“What Would You Do If ‘Pay For (Population Health) Performance’ Came To Your Community?,” David Kindig MD, PhD, University of Wisconsin at NRHA in Reno on 5/17/06
Community Health a Rural Opportunity (2 of 2)

And . . .

• Managerial and financial structures which have as their goal community health outcome improvement are primitive and need significant attention in the near future

• Rural communities have opportunities for national leadership on this issue

“What Would You Do If ‘Pay For (Population Health) Performance’ Came To Your Community?,” David Kindig MD, PhD, University of Wisconsin at NRHA in Reno on 5/17/06

4. Healthy Community Collaborations Not New

But now there is a fair amount of evidence it is moving from a third tier to a first tier focus.

“It's not about being conservative or liberal, it's about building our community or just moving through.”
It Has Been Around for Decades in Background

Association for Community Health Improvement, a program of AHA’s Health Research and Education Trust, has long focused on:

• health care delivery and preventive health systems to ensure accessibility and are accountable to local needs
• careful planning for and measurement of progress toward defined community health goals, and;
• broad community engagement to resolve systemic challenges to community health

2002 - Federal DHHS Rural Task Force

“The strong relationship between adequate income, sufficient food, strong social networks, and good health necessitates coordination among various health care and social service agencies…”

“In many rural communities, service providers often make alliances with one another and exhibit extraordinary resourcefulness and resilience.”

2004 - IOM Committee on Future of Rural Health

“Rural communities must reorient their quality improvement strategies from an exclusively patient- and provider-centric approach to one that also addresses the problems and needs of rural communities and populations.”

“A wide range of interventions are available to improve health in rural America, but priorities for implementation are not yet clear.”

“… catalogue and evaluate the potential interventions to improve health care quality and population health in rural communities.”

2007 - Traditional Providers & Public Health?

The National Steering Committee on Hospitals and the Public's Health, convened by Health Research and Education Trust, recommends that:

“hospitals engage in community-based collaboration bridging gaps in the public health care system. The report also emphasizes the need for innovation and collaboration between hospitals and other private and public health care organizations in order to expand access to care, reduce health disparities and prevent chronic disease.”

“Hospitals & Public’s Health” Recommendations

1. Eliminate health disparities
2. Coordinate care
3. Promote primary prevention
4. Optimize access to care for all
5. Advocate payment for prevention
6. Build the community’s capacity to stay healthy
7. Support recreating the public health infrastructure and
8. Expanding capacity
5. Why Aren’t We Doing It?

Because we follow $$$ incentives and mostly think of health coming from providers who fix us when broken.

Strategic Barriers to Providers Getting Involved

- **Tradition.** The role of providers has been seen as treating individuals. Population health seen as the job of local and state public health departments.

- **Resources.** Hospitals and clinics struggling to address traditional responsibilities are not looking for roles “that no one will pay us to do.”

- **Values.** The discomfort that many of us feel when talking about population health issues, that relate to individual behaviors – other people’s choices and “rights” to make those choices.

6. Starting or Expanding Collaboration

Collaboration isn’t easy; it takes more time; if the “cost” out weighs the benefit, do it on your own, keep it simple.

How Far Are You Ready To Go?

The Collaboration Primer by Gretchen Williams Torres and Frances Margolin
A Checklist for Successful Collaborating

- Host organization ready?
- The right partners involved?
- Shared vision unifies partners?
- Partners aware what is expected?
- Partners know partnership goals and objectives?
- People to do the work have been identified, staffed and made accountable?
- “Best practices have been researched and shared?
- Assets residing within the partnership have been mapped?
- Partnership encourages participation in and sustainability of its work?
- Partnership actively recruits new members?
- Defined governance model?
- Leadership is effective?
- Communication/outreach plan?
- Financial needs known and addressed?
- Work evaluated/revised?
- Partnership knows challenges that it faces?

Some Next Steps: State

- Advocate for improved population health measurement techniques and increased population health improvement valuation.
- Assist hospitals and clinics, and other stakeholders, to begin to link the mission of community health improvement to budget, operations, and performance measurement.
- Partner with academic institutions to design research projects around provider performance improvement and population health measurement.

“Population Health Improvement & Rural Hospital Balanced Scorecards,”
Some Next Steps: Local Community

- Devote a periodic Board meeting or a portion of every Board meeting to review available population health indicators.
- Add Board members with specific interest in population health measurement and improvement.
- Create a “population health” subcommittee of the Board to seek community partnerships.
- Consider employees as a “community” and develop interventions to improve employee health. Then, expand the experience to the larger community.

Tip #1: Partnership Grants Must Be “Authentic”

1. Good grants are good “business” plans.
2. They start with an idea about which there is passion and that you all would do with your own organizations money, if you it.
3. There needs to be a clear “public purpose” for the requested use of public/foundation funds.
4. If successful, real value added—justifying the funder’s investment and reviewers time.
5. Bold/Innovative is good and characteristic of funded grant. But reviewers as a whole can be conservative.
Tip #2: Not Every Group Is a Partnership

1. A partnership has a written agreement that defines its purpose, member roles and responsibilities.
2. A partnership works according to an explicit strategic plan that includes accountability.
3. A partnership is not owned/dominated by one entity.

Tip #3: It’s About Social Entrepreneurship

1. Network development is an entrepreneurial activity and as such success is not certain.
2. The odds can be increased if all participants understand that networks are businesses, albeit typically “non-profit.”
3. A key responsibility is to NOT become a small business startup that fails after running through its initial capital (aka grant).
4. Sustainability is too often thought of as just one of those annoying questions one has to answer at the end of the applications about “life after the grant.”
Tip #4: Communication is Core Competency

RWHC Eye On Health

- Everyone Participates, No One Person Dominates
- Listen As An Ally–Work To Understand Before Evaluating
- An Individual’s Silence Will Be Interpreted As Agreement
- Assume Positive Intent First When Things Go Wrong
- Minimize Interruptions And Side Conversations

"You're too dumb to understand why you're wrong and I'm right, even if I could explain it."

RWHC Meeting Guidelines from Tercon, Inc.

---

Tip #5: Strategy is Both Art & Science

Strategy is both the art and science of employing the political, economic and psychological forces of a group to afford the maximum support to adopted policies."
Tip #6: Balanced Portfolio of Services/Advocacy

<table>
<thead>
<tr>
<th>Risk</th>
<th>Value Added</th>
</tr>
</thead>
<tbody>
<tr>
<td>L</td>
<td>L - L</td>
</tr>
<tr>
<td>L</td>
<td>L - H</td>
</tr>
<tr>
<td>H</td>
<td>H - H</td>
</tr>
</tbody>
</table>

Green: “Low Risk - High Value Added” Do it!
Yellow: “Low Risk - Low Value Added” helpful in short run; “High Risk - High Value Added” provides real value over the long run.

Tip #7: Seeking the Win-Win is Necessary

“Say ‘Yes, if …’ rather than ‘No, because…””

*Anne Woodbury, Chief Health Advocate for Newt Gingrich’s Center for Health Transformation
7. Become a More Active & Effective Advocate

RWHC Eye On Health

“I could agree with your position, if I wasn’t raising money for reelection.”

What Drives Advocacy?

• Need to Correct Bias – Critical Access Hospitals
• Opportunity to Reframe – Binge Drinking
• Short-term Fix Possible – Provider Payments
• Broad Coalition Possible – Workforce Data
• Address Core Need – Physician Supply
• Anticipate Problems – Medicare Managed Care
• Can’t Be Avoided – Healthcare Costs
• Long-term Significance – Healthier Communities
Your Advocacy Behaviors Matter

- Be Brief
- Be Accurate - NEVER false or misleading info
- Personalize Your Message - cite examples
- Be Prepared - know your issue
- Be Aware Every Issue Has At Least Two Sides - there are stakeholders on the other side
- Be Courteous/Don’t Threaten
- Be Patient - long process; be in for long haul

Three Prong Advocacy Strategy

**Make your best case:** Develop concise, credible, persuasive, fiscally responsible, but emotive arguments.

**Make friends and form alliances:** Find Congressional champions, develop agency contacts, form alliances with a diverse set of groups.

**Make it happen:** Use some or all of your advocacy tools – government relations, grassroots and media advocacy – based on your level of engagement.
8. Anticipate Barriers to Change

---

Examples of Barriers to Change (1 of 2)

- Constituencies Often Trump “Good Sense”
- Hope of Gain Must Exceed Fear of Loss
- Trends You See Must Be Made Real
- Impact on Personal Incomes Matter
- Sometimes Agencies Have Own Agenda
- Collective Denial Trumps Raw Numbers
- Never Underestimate Prevalence of Biases
- “Analysis” May Be Obvious, Action Harder
Examples of Barriers to Change (2 of 2)

- Important to Share “Ownership” of Problem
- Stated & Underlying Intent May Differ
- Politics Reflects Our Conflicting Values
- Tradition Conceals Important Questions
- Reasons Policymakers May Stay Uninformed
- Change Tougher if Ignore Cultural Norms
- Challenge to Move Dollars “Upstream”
- Shooting Messenger Sometimes 1st Response
